

STADLER – YOUR PARTNER FOR CERTIFIED MAINTENANCE

The requirements

The European Commission aims to increase safety and quality in rail transport. From 16 June 2022, keepers of railway vehicles must be able to prove that they have named an **Entity in Charge of Maintenance** (ECM) that is certified in accordance with Commission Regulation (EU) No. 2019/779.

Our solution

Stadler meets the high standards required, is certified in accordance with the new European regulation, and can act as an ECM.

- broad expertise in maintenance management for railway vehicles
- central centre of competence for implementing and coordinating ECM 1 and 2 processes
- many options for optimising the most important maintenance parameters
- wide network as a system provider and experience as a global maintenance provider

ECM functions in accordance with (EU) 2019/779

Management

(ECM 1)

- Most important ECM function
- Responsible entity
- Monitors and controls all other subfunctions
- → designated by the keeper of the vehicle and is registered in the National vehicle Register (NVR)

Fleet Maintenance Management (ECM 3)

- Supervises the maintenance
- Ensures that maintenance deadlines are respected.
- Ensures that the vehicles are returned to operation restarted

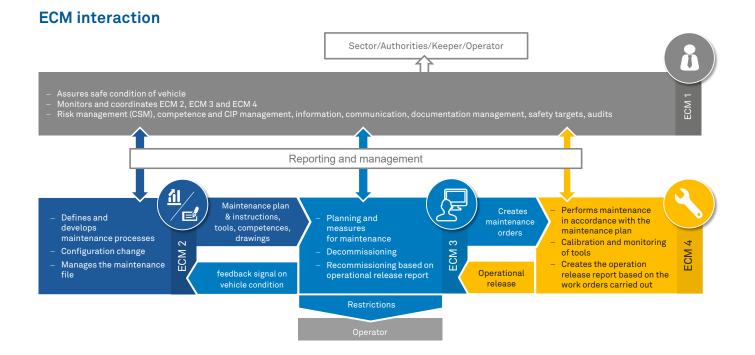

Maintenance (ECM 2)

- Creation of maintenance manuals based on manufacturer documents
- Further develops the manuals based on its experience
- → is obligated to create own maintenance manuals. The manufacturer manuals will only be recommendations in future

Maintenance Delivery (ECM 4)

- Performs maintenance on the vehicle
- Documents the work carried out
- Provides the operational release report after maintenance is performed

Your benefits

As your ECM, Stadler will use its expertise to further develop maintenance activities and optimise your fleet. You benefit from a unique solution and can guarantee the safety of the technology and operation for the whole life cycle of your vehicles.
